Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

Hexagonal is the more classic approach and also well suited for pure lead.
 Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschöße.

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

Hexagonal is the more classic approach and also well suited for pure lead.
 Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschöße.

Changing from bigger to smaller cartridge bottom will require you to get a smaller Magazine!
Example; **.357 Sig to 9x19 = Magazine needed / .40 to .357 Sig = No Magazine needed**

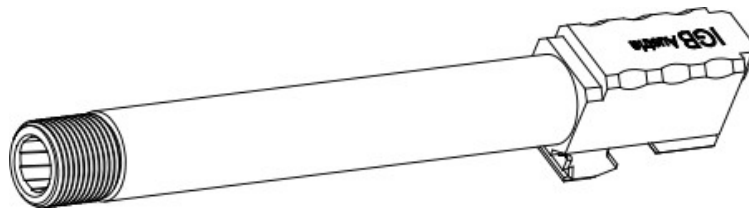

Wechsel von bestimmten Patronenbodendurchmessern benötigt ein Magazin!
Beispiel; **.357 Sig zu 9x19 = Magazin benötigt / .40 zu .357.Sig = Kein Magazin benötigt**

IGB AUSTRIA - GUIDE Threadings

Threadings / Gewinde

Not all calibers support all threadings.
 Not all diameters support all threadings.

Example: $\frac{1}{2}$ x 28 UNEF does not fit a 12.5 mm barrel
 M15 is too big for a 14.5 mm barrel
 .45 ACP is too big for $\frac{1}{2}$ x 28 UNEF

Nicht alle Kaliber sind für gewisse Gewinde geeignet.
 Nicht alle Durchmesser sind für alle Gewinde geeignet.

Beispiel: $\frac{1}{2}$ x 28 UNEF passt nicht auf einen 12.5 mm Lauf
 M15 ist zu groß für einen 14.5 mm Lauf
 .45 ACP ist zu groß für $\frac{1}{2}$ x 28 UNEF

IGB BARRELS IDEAS

Make it YOUR Gun with the IGB Variety
 Machen Sie es zu IHRER Pistole mit den IGB Variationen.

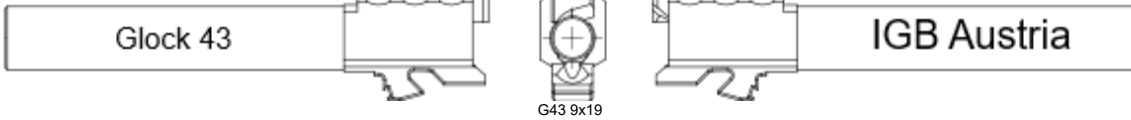

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

Hexagonal is the more classic approach and also well suited for pure lead.
 Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschoße.

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

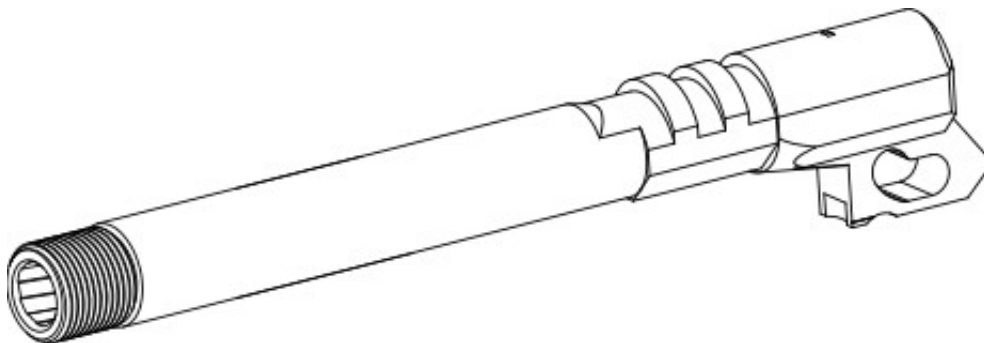

Hexagonal is the more classic approach and also well suited for pure lead.

Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschoße.

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

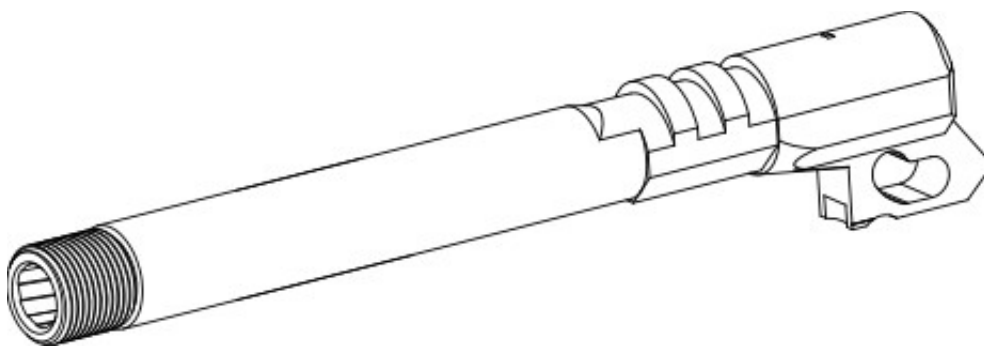

Hexagonal is the more classic approach and also well suited for pure lead.
 Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschoße.

IGB AUSTRIA - GUIDE Threadings

Threadings / Gewinde

Not all calibers support all threadings.
 Not all diameters support all threadings.

Example: $\frac{1}{2}$ x 28 UNEF does not fit a 12.5 mm barrel
 M15 is too big for a 14.5 mm barrel
 .45 ACP is too big for $\frac{1}{2}$ x 28 UNEF

Nicht alle Kaliber sind für gewisse Gewinde geeignet.
 Nicht alle Durchmesser sind für alle Gewinde geeignet.

Beispiel: $\frac{1}{2}$ x 28 UNEF passt nicht auf einen 12.5 mm Lauf
 M15 ist zu groß für einen 14.5 mm Lauf
 .45 ACP ist zu groß für $\frac{1}{2}$ x 28 UNEF

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.

Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

Hexagonal is the more classic approach and also well suited for pure lead.

Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschoße.

Polygonal vs Hexagonal

Polygonal is very smooth inside and therefore very gastight for high velocity.
 Polygonal ist formbedingt sehr Gasdicht für hohe Geschwindigkeiten.

Hexagonal is the more classic approach and also well suited for pure lead.
 Hexagonal ist der klassischere Ansatz und gut geeignet für reine Bleigeschoße.

IGB AUSTRIA - GUIDE Threadings

Threadings / Gewinde

Not all calibers support all threadings.
 Not all diameters support all threadings.

Example: $\frac{1}{2}$ x 28 UNEF does not fit a 12.5 mm barrel
 M15 is too big for a 14.5 mm barrel
 .45 ACP is too big for $\frac{1}{2}$ x 28 UNEF

Nicht alle Kaliber sind für gewisse Gewinde geeignet.
 Nicht alle Durchmesser sind für alle Gewinde geeignet.

Beispiel: $\frac{1}{2}$ x 28 UNEF passt nicht auf einen 12.5 mm Lauf
 M15 ist zu groß für einen 14.5 mm Lauf
 .45 ACP ist zu groß für $\frac{1}{2}$ x 28 UNEF
